## Blockout Ambient

Block-out fabrics, as the name suggests, are designed to block out light completely. They are made of heavy, materials that are ideal for bedrooms or any room where you want to eliminate as much light as possible. They are also effective at reducing noise and preventing drafts, making them a practical choice for energy-efficient homes.

## Zebra Rollers

No other blind is quite like the Zebra Blind. It brings together practical attributes with a higher level of elegance. The Zebra Blind combines Roller Blind ease of operation, with the similar versatility and light control of a Venetian Blind.

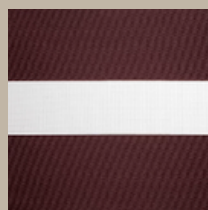

Innovative and functional, the Zebra Blind utilises two layers of a translucent and opaque striped fabric. The front layer of horizontal stripes moves independently of the back layer, allowing the stripes to pass one another, creating an open or closed effect depending on where you stop the blind.
